

The **mothersmilkbank** charity provides pasteurised donor mothers' milk to babies where mother's own milk is not available.

It's simple human milk for human babies

Who, UNICEF, endorsed.

Australian Federal Government recommendation to provide funding has yet to become a commitment as a health priority

Join in **sponsor David Alley Iron Man Australia**
Port Macquarie NSW April 6th 2008

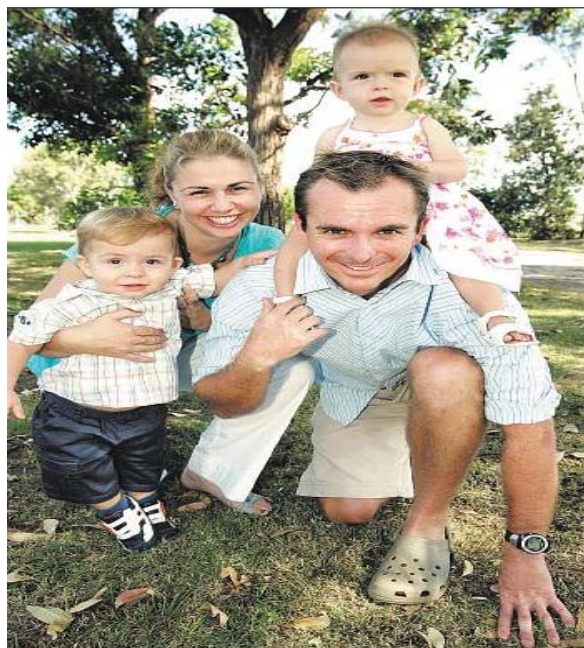

The Alley family say 'thank you' Twins : Chloe and Bailey thrived on donor mothers milk.

Stephanie and **David Alley** believe their children's access to breast milk helped them to avoid many of the problems other babies born so prematurely have been faced with. Instead of having their fragile and underdeveloped stomachs try to digest a man made formula, Bailey and Chloe were able to drink in, all the precious nutrients of breast milk in their most vulnerable months and have continued to thrive. For Stephanie "It is really no different to buying a carton of milk. It's all pasteurized and has so many benefits"

Sponsor David Alley.

*David has put his heart and soul into training, with the aim to raise the **mothersmilkbank** funds so other babies like Chloe and Bailey will have access to donor milk*
